QA Engineer
Technology Business Unit
Location: Skopje, North Macedonia

About the role

We are seeking to recruit a Quality Assurance Engineer to work alongside our IDOX Health Quality Assurance Team in our office in Macedonia to ensure smooth and timely delivery of products as well as a high-quality service to our customers.

Key Responsibilities:

- Participate in defining a Test Strategy in alignment with the business goals, functional and non-functional requirements;
- Maintain a QA environment;
- Analyze business requirements and technical specification documents to determine set of test cases;
- Design, develop and perform test case execution, including database querying, according to the planned test strategy;
- Report issues found in testing promptly and accurately, using an Issue Tracking System;
- Work closely with the development team to improve quality of the product;
- Communicate with business stakeholders where necessary;
- Provide a Testing Summary Report and recommendations for releases that reflects the quality attributes of the software under test.

To be successful, you'll need to bring the following attributes:

- Knowledge of the software testing lifecycle;
- Experience in testing Web Services;
- Understanding of automation testing;
- Understanding of performance testing;
- Experience in working with Agile methodologies;
- Understanding of version control and source code repository, branching and merging;
- Strong analytical and problem-solving skills.

Additional desirable qualities:

- Ability to communicate effectively, i.e. strong written and verbal communication skills;
- Ability to learn quickly and effectively; to remain focused in a diverse team environment.

About Idox plc

Idox is the leading applications provider to UK local government for core functions relating to land, people and property, such as its market leading planning systems and election management software. Over 90% of UK local authorities are now customers. Idox provides public sector organisations with tools to manage information and knowledge, documents, content, business processes and workflow as well as connecting directly with the citizen via the web, and providing elections management solutions. It also supplies in the UK and internationally, decision support content such as grants and planning policy information and corporates compliance services. Idox delivers engineering document control, project collaboration and facility management applications to many leading companies in industries such as oil & gas, architecture and construction, mining, utilities, pharmaceuticals and transportation in North America and around the world.

The Group employs c.700 staff located in the UK and worldwide, including Asia, Europe and North America. Idox has many offices across the UK and therefore travel will be required.

The Benefits

This post commands a competitive salary depending upon experience, along with an excellent benefits package.

How to apply

Applicants should submit a CV, and a short cover letter *(maximum 500 words - including salary expectation, and current remuneration)* explaining why they feel they would be suited to this role to Join.Us@idoxgroup.com.

Please note successful applicants will need to satisfy the BPSS guidelines (Baseline Personnel Security Standards) which consist of the receipt of satisfactory references covering the last 3 years of employment; an identity check; verification of eligibility to work in the UK; and a Basic Disclosure Check. This is in order to help us make safer recruitment decisions and prevent unsuitable people from working with access to personal and sensitive data.

Privacy Notice

As part of the recruitment process we will collect data about you in a variety of ways including the information you would normally include in a CV or a job application cover letter, or notes made by our recruiting officers during a recruitment interview.

Please read the Idox Recruitment Data Privacy Policy here http://www.idoxgroup.com/privacy.html
