iAssets

Intelligent asset tracking for smarter care

Track critical medical equipment
in real–time – improve patient safety, reduce
costs, and boost operational efficiency.

Idox. Do more.

GS1

Total visibility. Real-time control

Idox iAssets is a powerful asset tracking solution designed specifically for healthcare estates from acute hospitals to community clinics and private providers. Supporting RTLS, RFID, Wi-Fi, Bluetooth and GPS, iAssets delivers true hybrid tracking across all asset types, wherever they are.

Flexible tracking technology

Bluetooth · Cellular · GPS · Wi-Fi · RFID

Built for healthcare, scaled for growth

Whether it's infusion pumps, beds, ventilators or IT equipment, iAssets helps you save clinical time, reduce equipment costs, and meet compliance goals, all while improving patient safety and care continuity.

Hybrid tracking – any device, anywhere

Why choose iAssets

Supports regulatory standards
MGS1 compliant, Scan4Safety aligned, and built to DCB0129 standard, ensuring regulatory compliance and promoting patient safety.

Drive efficiency and improve patient flow
Ensure medical equipment is always available when and where it's needed – across hospitals, community settings, and virtual wards – improving staff workflows and reducing patient wait times.

Reduce risk and improve KPIs
Mitigate clinical and operational risk by reacting quickly to Field Safety Notices (FSNs) and improving planned preventive maintenance (PPM) KPIs.

Reduce costs and avoid over-procurement
Prevent loss and theft, reduce unnecessary purchases, and extend the life of your equipment.

Free up time for patient care
Real-time tracking eliminates time spent searching for equipment, letting staff focus on what matters most – patient care.

Improve patient and staff satisfaction
Faster, more efficient care enhances the patient experience, while better tools and access boost staff morale and reduce stress.

Enhance emergency readiness
Maintain a 360-degree view of critical assets for rapid access during emergencies.

Maximise asset utilisation
Optimise usage of high-value equipment, reduce downtime, and support regulatory compliance.

Strengthen infection control
Track sterilisation status to ensure all assets are clean and ready for safe use.

83 hours
of nursing time saved per day
£250,000+
potential annual savings per trust

20%+
more syringe pumps available for palliative care

# Leverage existing Wi-Fi infrastructure

Make the most of your existing Wi-Fi infrastructure and expand your tracking footprint with our pay-as-you-grow model.

Active RTLS tags

Wi-Fi access points (AP) with built in Bluetooth (BLE)

Centralised iAssets platform

Improved medical asset tracking features

Geofencing alerts
Set virtual boundaries around critical areas and receive notifications when tracked medical assets enter or exit designated zones across your ICS environment, ensuring proactive management and reducing the risk of lost or misplaced equipment.

GIS integration
Visual asset tracking with intuitive graphical location views, making it easier to navigate your healthcare environment and quickly retrieve critical assets.

Data segmentation
Effortlessly segregate data across multiple departments to streamline operations and enhance reporting, allowing for more informed decision-making and operational efficiency.

Comprehensive reporting
Access to standard reports including asset history, sterilisation, utilisation, and status, offering insights that drive better management and operational improvements.

System integration
Integrate iAssets with asset management systems like E-Quip, ECRI and BackTrack and facilities management systems like CAFM Explorer via the open API. Integrations help streamline workflows, reduce data entry, and improve asset maintenance and inventory control.

Pay-as-you-grow
Start small and expand as your needs grow. Our platform adapts to your unique requirements.

"

"In a hospital, minutes can define life or death. Every second saved with iAssets is invested in patient care."

Chesterfield Royal Hospital NHS Foundation Trust

"Being able to locate service-due devices across multiple sites has boosted staff morale and compliance."

Gloucestershire Hospitals NHS Foundation Trust

"We cancelled an £80,000 contract and reduced inventory by 25%—all thanks to tracking visibility."

Homerton University Hospital

Want to see iAssets in action? Let us show you how intelligent asset tracking can unlock value across your healthcare estate.
