

iMatch Cloud

Enabling fast, easy-to-use and accurate address matching & cleansing.

The challenge of maintaining address data

With more than two million address changes in Great Britain **every six weeks**, maintaining accurate and up-to-date address data is a time-consuming challenge for any organisation. Whether you're delivering goods and services, maintaining location-based assets or deploying emergency services, accurate address data is critical for driving productivity and efficiency.

A cloud-based solution for address cleansing and data migration

iMatch Cloud (Aligned Assets platform) is the new, cloud-hosted iteration of our matching and cleansing solution. Designed for ease of use, it can be utilised to match a list of addresses to the most up-to-date and accurate address dataset available, Ordnance Survey's AddressBase Premium. Used primarily for address cleansing and data migration, it is fast, resilient and capable of handling millions of records.

British Standard BS7666

By cleansing address data to the British Standard BS7666, our solution provides the Unique Property Reference Numbers (UPRNs) to underpin all addresses. This ensures a single truth for every location enabling the linking of data from numerous sources.

Why choose iMatch Cloud?

Universal accessibility with maximum security

iMatch Cloud can be accessed from anywhere with an internet connection. It is underpinned by our new Symphony Security module that ensures safe and secure access.

Optimised user experience

You do not need to be an addressing expert to use iMatch Cloud as it has been designed to be as user-friendly and efficient as possible. As a cloud-based solution, it can be scaled to support mass usage across your organisation.

Lower cost of ownership

Our fully cloud-based solution removes the requirement for costly IT infrastructure on premise, saving on hardware, energy and maintenance costs. Fully supported, maintained and updated by Idox, council IT resources can be reallocated to other vital project work.

Choose iMatch Cloud for fast, secure and accurate address matching and cleansing from anywhere with an internet connection.
